

## Custom Overrides (5.2)

Custom overrides can be created to override certain restrictions in the regulations. They can be managed via Administration > Custom Validation.

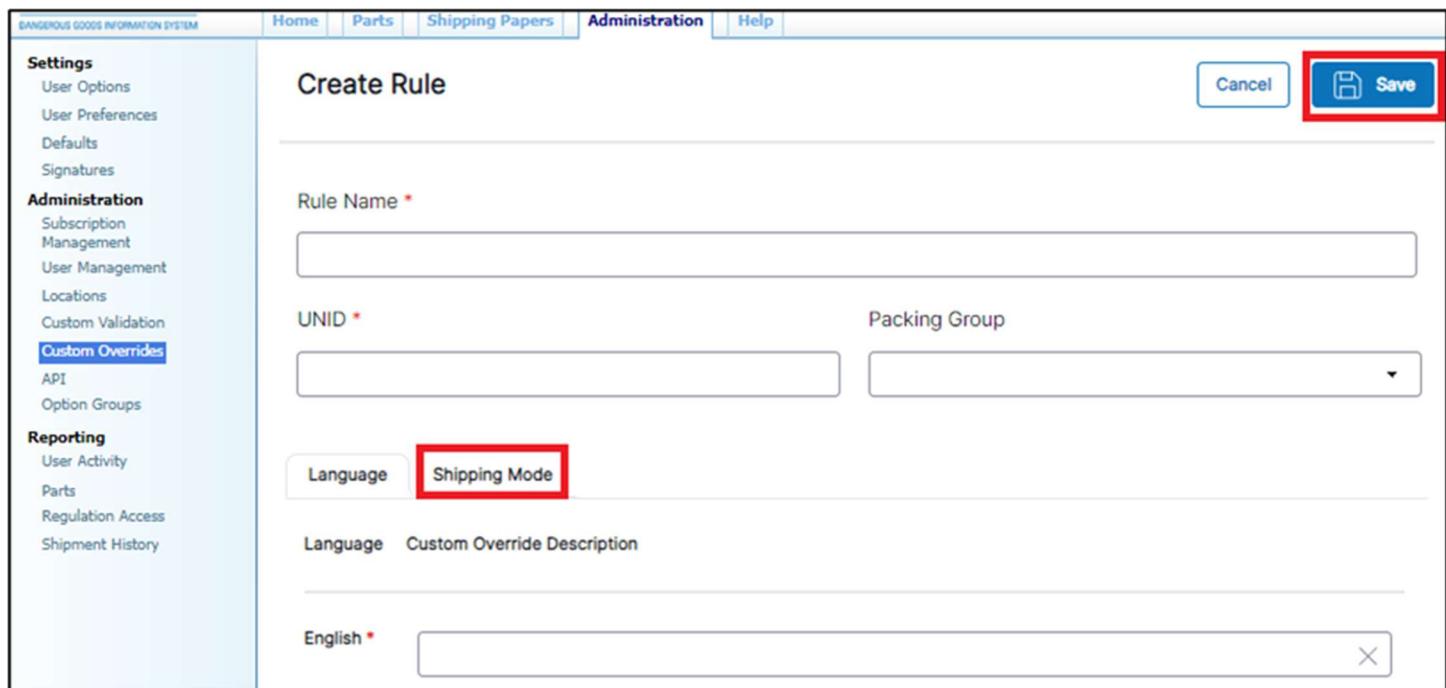

### Creating New Overrides

To create a new Custom Override, click on Create Rule in the top right-hand corner.

The screenshot shows a navigation bar with tabs: Home, Parts, Shipping Papers, Administration (which is selected), and Help. On the left, there's a sidebar with 'Settings' (User Options, User Preferences), 'Administration' (Subscription, Management, User Management, Locations, Custom Validation, Custom Overrides - which is selected), and 'Reporting' (User Activity, Parts, Regulation Access, Shipment History). The main content area is titled 'Custom Overrides' and contains a blue button labeled '+ Create Rule' with a red box drawn around it.

You can then enter a Rule Name and Custom Override Description. The UNID is the only criteria that is required to trigger the override; packing group can also be chosen for the UNID you select. Regulation, Form Type, Carrier, and Transport Mode can be selected from the Shipping Mode tab.

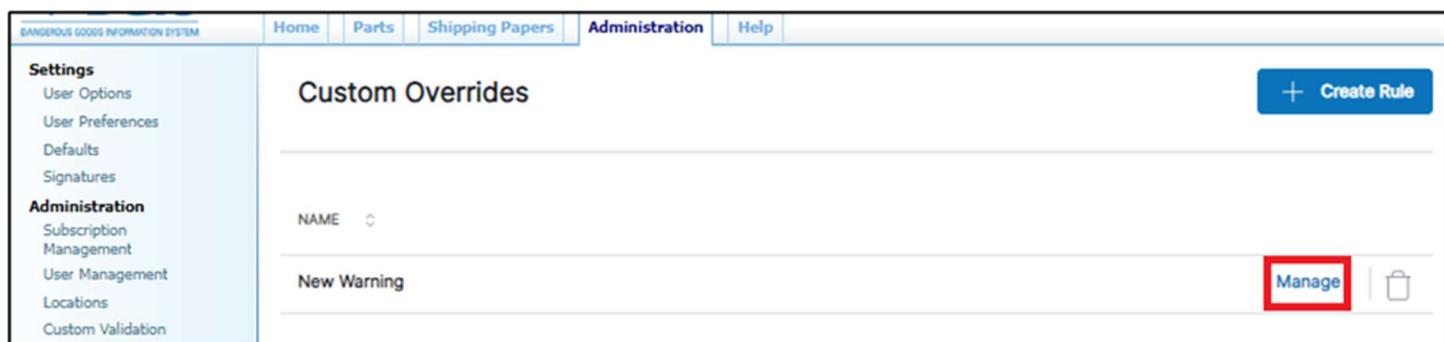

The screenshot shows the 'Create Rule' form. On the left is a sidebar with the same navigation and reporting options as the previous screenshot. The main form has a title 'Create Rule' and a 'Save' button with a red box around it. It includes fields for 'Rule Name \*' (a text input field), 'UNID \*' (a text input field), 'Packing Group' (a dropdown menu), and tabs for 'Language' and 'Shipping Mode' (with 'Shipping Mode' highlighted by a red box). Below these are sections for 'Custom Override Description' (with tabs for 'Language' and 'English \*') and a text input field.

### Editing Existing Overrides

To edit an existing Custom Override rule, click Manage for the rule. The criteria for that rule will open on the screen. You can edit any of the criteria fields, then click the Save button at the top right of the screen to save any changes to that rule.

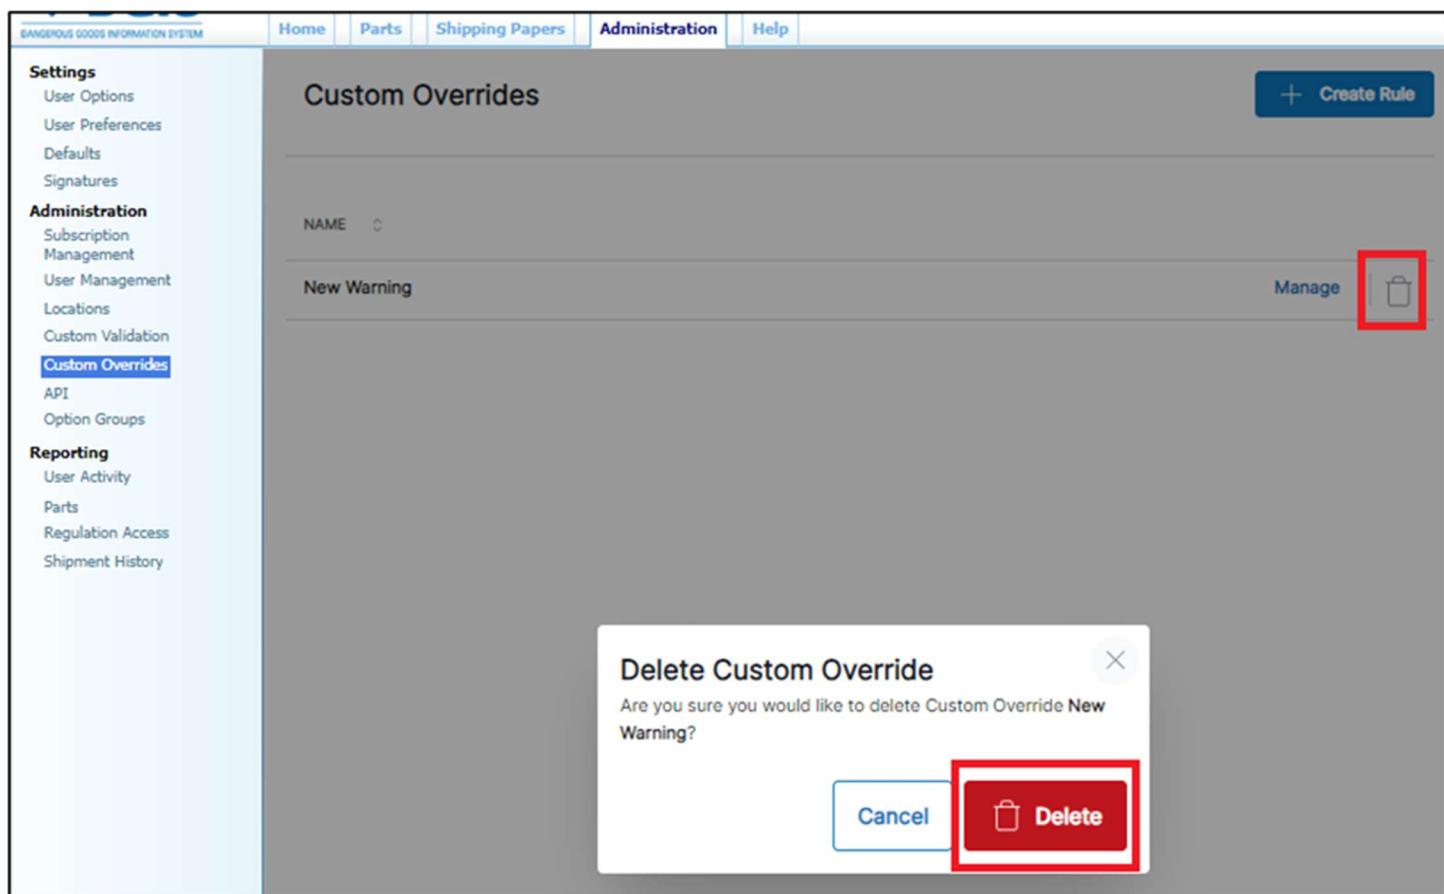

## Custom Overrides (5.2)

The screenshot shows the 'Custom Overrides' page. On the left, a sidebar lists 'Settings' (User Options, User Preferences, Defaults, Signatures) and 'Administration' (Subscription Management, User Management, Locations, Custom Validation). The 'Custom Overrides' section is highlighted. At the top right is a 'Create Rule' button. The main area shows a table with one row. The row contains the text 'NAME' with a dropdown arrow, the text 'New Warning', and a 'Manage' button (which is highlighted with a red box) and a trash icon.

### Deleting Overrides

To delete an existing Custom Override rule, click the Trash icon for that rule. Click the Delete button on the prompt and that rule will be deleted from the program.

The screenshot shows the 'Custom Overrides' page with the 'Custom Overrides' section selected in the sidebar. A delete confirmation dialog box is overlaid on the page. The dialog box has a title 'Delete Custom Override' and a message 'Are you sure you would like to delete Custom Override New Warning?'. It contains two buttons: 'Cancel' and 'Delete', with 'Delete' highlighted with a red box. The trash icon in the original screenshot is also highlighted with a red box.
